

- Front-end: HTML, CSS, JavaScript, jQuery, Bootstrap, Tailwind, responsive design, cross-browser compatibility
- Back-end: PHP, Laravel, MySQL.
- DevOps: Apache/Nginx basics, cPanel, hosting setup, staging-to-production deployment, basic Linux commands.
- CMS & E-commerce: WordPress, Drupal, Zen Cart.
- Tools & Platforms: Git (version control, branching, merging), Mailchimp, Zoho CRM integration.
- Design & UI Tools: Figma, Adobe Photoshop, Google Web Designer.
- Development Practices: Performance optimization, testing, debugging, code review, Agile/Scrum workflow.
- Project & Task Management: Task tracking, time estimation, sprint handling, stakeholder communication, QA coordination.

Profile

Full Stack Web Developer with experience in developing and maintaining web applications and e-commerce platforms. Proficient in PHP, JavaScript, HTML5, and CSS3, with a strong focus on performance, usability, and system stability. Experienced in CMS customization, testing (SIT/UAT), and issue resolution. Contributed to business growth through site optimization and affiliate program support. A reliable team player with the ability to follow requirements, communicate effectively, and deliver tasks on time in a structured work environment.

Professional experience

Numinix, Vancouver, Canada

Jan 2025 to Present

Full Stack Web Developer (Remote)

My responsibilities include maintaining and enhancing the Zen Cart e-commerce platform, improving system performance, and ensuring smooth deployment workflows. I collaborate with QA, designers, and stakeholders to deliver stable and scalable features:

- Developed and enhanced front-end and back-end features for e-commerce systems
- Implemented checkout improvements and form validations for better data accuracy
- Optimized website performance using lazy loading, image compression, and asset minification
- Conducted cross-browser and cross-device testing to ensure consistent UI/UX
- Managed Git workflows and handled staging-to-production deployments
- Collaborated with QA and stakeholders to deliver features on time

Stack: PHP, JavaScript, jQuery, HTML5, CSS3, MySQL, Zen Cart CMS, Git, Mailchimp integration, cPanel, Apache, basic Linux commands, performance optimization techniques

Reason for Leaving: Seeking a stable, long-term onsite or hybrid role with visa support and growth opportunities

Tabacfree, Bangkok, Thailand

Dec 2023 to Sept 2024

Web Developer (Onsite)

Worked on WordPress-based e-commerce platforms, focusing on integration, customization, and marketing-related features. Collaborated closely with design and marketing teams:

- Developed and maintained WordPress e-commerce websites
- Integrated Zoho CRM for data synchronisation and automation
- Customized themes and plugins to meet business requirements
- Built responsive UI components using HTML, CSS, and JavaScript
- Managed affiliate program features to support business growth

Stack: WordPress, PHP, JavaScript, jQuery, HTML5, CSS3, MySQL, Zoho CRM API integration, Git, cPanel, SEO basics

Reason for Leaving: Contract/project completed, company operations reduced after leadership relocation

Unicomi, Singapore

Nov 2021 to Dec 2023

Web App Developer (Remote)

Focused on responsive web development, CMS, landing pages, and marketing assets, ensuring pixel-perfect implementation from design:

- Converted Figma/PSD designs into responsive web pages and landing pages
- Developed Web UI and email templates using HTML, CSS, Bootstrap, and JavaScript
- Created marketing banners and interactive content
- Ensured cross-browser compatibility and responsive behaviour
- Fixed bugs and maintained Wordpress website performance

Stack: HTML5, CSS3, Bootstrap, JavaScript, jQuery, Figma, Adobe Illustrator, Google Web Designer, responsive design, cross-browser testing

Reason for Leaving: Seeking career growth and an onsite role in a more international working environment

ERA Myanmar, Yangon, Myanmar

Jun 2019 to Oct 2021

Web App Developer (Onsite)

Developed web applications and CMS platforms with a focus on backend logic and database management:

- Built web applications using PHP (Laravel), Vue and MySQL
- Developed and maintained CMS and marketing websites/microsites
- Designed and managed database structures and queries
- Troubleshoot and resolved system bugs and issues
- Ensured performance and scalability of applications

Stack: PHP (Laravel framework), MySQL (database design, optimization), HTML5, CSS3, Bootstrap, Vue, JavaScript, jQuery, Drupal, Wordpress, REST API basics, Git

Reason for Leaving: Business impact from COVID-19 led to reduced projects and team restructuring

ETIQA, Singapore

May 2017 to Nov 2017

Web Developer (Onsite)

My responsibilities include developing and maintaining CMS-based and in-house PHP web applications, supporting testing processes, and ensuring system stability. I collaborate with teams to deliver reliable features:

- Developed in-house PHP applications, implemented website features and customized CMS frameworks
- Built and maintained internal Staff Portal for data management
- Participated in SIT and UAT testing, identified issues, and delivered fixes
- Maintained application performance, stability, and availability
- Collaborated with teams to gather and implement requirements
- Supported testing activities and resolved reported issues

Stack: PHP, JavaScript, jQuery, HTML5, CSS3, MySQL, CMS frameworks, Web Components, testing (SIT/UAT)

Reason for Leaving: Short-term project/contract completed

NEX, Yangon, Myanmar

Jan 2016 to Feb 2017

Web Developer (Onsite)

My responsibilities include developing and maintaining client websites and CMS platforms, delivering customized solutions, and supporting ongoing maintenance. I collaborated with clients and project teams to ensure smooth delivery:

- Developed custom templates using WordPress and Drupal
- Maintained and updated client websites
- Provided technical support and fixed bugs
- Assisted clients with website design and content structure
- Monitored project progress and reported to Project Manager

Stack: WordPress, Drupal, PHP, MySQL, HTML5, CSS3, Bootstrap, JavaScript, jQuery, cPanel

Reason for Leaving: Career progression

Creative Web Studio, Yangon, Myanmar

Jun 2012 to Nov 2015

Web Developer (Onsite)

My responsibilities include handling full-cycle web development from design to deployment, delivering responsive websites, and supporting system maintenance. I collaborated with clients and teams to meet project deadlines:

- Developed responsive websites and web applications
- Created wireframes and prototypes based on client requirements
- Managed both front-end and back-end development
- Maintained and supported deployed systems
- Identified and fixed website issues

Stack: PHP, MySQL, HTML5, CSS3, Bootstrap, JavaScript, jQuery, basic UI/UX design

Reason for Leaving: Career growth
